 Faculty Advisor E. M. Cool

THE AUBURN FORESTER

By Harry V. Dunn, Jr.

During the winter quarter, 1946, the *Auburn Forester*, sponsored by the A.P.I. Forestry Club, was published for the first time. It was a four page mimeographed issue under the editorship of Vernon Yow.

As a matter of basic policy it was stated that "with this initial Forestry News Sheet (*Auburn Forester*), the Forestry Club is attempting to put before all forestry students a means of getting better acquainted and of increasing the value and interest of forestry instruction. An attempt will be made to publish current forestry items that will be of interest to all forestry students."

"The *Auburn Forester* should be considered the personal expression of all forestry students, a paper for the foresters about the foresters. This is the forestry student's baby; let us all do a good job in making it survive and grow."

"The *Auburn Forester* should be an organ used for the recognition of meritorious work, no matter how small. It should establish and keep itself on a high journalistic plane without need of official censorship. To fulfill its purpose, it must be handled and run by the Forestry Club without profit. It should maintain a spirit of friendship and fun; but should keep clear of low humor and near-libel that so often appears in small and informal papers."

"Restating an old adage, 'A chain is no stronger than its weakest link,' this paper will be no better than the support that forestry students give it. It must have your full support. The paper is not for a minority, but for all forestry students. Articles from you will be welcome and will be published."

Today, four years later, it is necessary to broaden that policy to embrace alumni as well as students. With the graduation of six more students last December the total number of forestry alumni from A.P.I. has increased to 124. A great many of the alumni seem sincerely interested in the activities and progress of the Forestry Department and seem especially interested in keeping up with acquaintances made during their stay at Auburn as students. Their sincerity in these respects was demonstrated when they organized the Auburn Alumni Association in 1950.

It is hoped that in the future with increasing numbers of men graduating that the Forestry Alumni Association will become a strong, closely knit organization with its own publication capable of rendering greater and more specialized services to its members. However, until that time there is an important need for maintaining the ties between the individual alumnus and between the alumni and school.

With this in mind it has been the policy of the Forestry Club to mail the *Auburn Forester* to each alumnus who

has been interested enough to keep his address up to date. This has been possible only through partial financial support from the alumni. With the ever growing roll of alumni, this proportionate financial support has become imperative and as long as it is forthcoming the Forestry Club, in addition to following its original policy, dedicates the *Auburn Forester* to the service of the alumni until that service is no longer needed.

With this new and improved issue of the *Auburn Forester* we have made an effort to give our readers, especially the alumni, up-to-date and useful information. All conscientious, constructive criticism, comments or contributions that any reader may have concerning the *Auburn Forester* will be appreciated.

It is interesting to note that of the 300 copies of the *Auburn Forester* printed, 124 are mailed to alumni, 88 are mailed to prominent people in other forestry schools, State and Federal agencies and industry, 13 are distributed on the campus to Deans, department heads and Librarians and 75 are placed in the reading room of the forestry building for distribution to students, faculty, visitors and otherwise interested people.

FORESTRY CLUB ELECTS OFFICERS

At the concluding meeting of the Fall Quarter, the Forestry Club elected the following new officers for the Winter Quarter: Lewis B. Walker, President; Carl H. Struck, Jr., Vice-President; G. E. Gibson, Secretary; Robert I. Smith, Treasurer and Alvis W. Fyfe, Jr., Reporter.

STEPS FORWARD-- AND A REMINDER

By Ted Dillon

Although operating with the smallest student membership since its organization, the Silvanus Society is far from inactive. Unless one is a member or keeps in pretty close touch with the members, however, this fact is often not apparent. In order that the students and any other interested persons might not be ignorant of its activities, the Silvanus Society presents the following as an informal progress report covering business and projects outstanding at the present time.

Of foremost importance, to the school as a whole, is the status of our petition to become affiliated with the national honorary forestry fraternity, Xi Sigma Pi. Perhaps some of you are aware of the progress being made in this direction, but I imagine that a good many are not aware that such a movement is under way.

Last year, under the direction of forester Bill Black, a petition was drawn up stating our desire to have a chapter of Xi Sigma Pi located here at Auburn. The petition was sent through the Council of Deans, approved, and then forwarded to the national headquarters of the fraternity. Since that time we have received two letters concerning the status of the petition, both indicating that it was meeting with unanimous approval. Our last correspondence with the national headquarters stated that there was a possibility that the installation would take place in December, shortly after their annual meeting in Biloxi, Mississippi. This was the last word we have received. The status of our petition then fell,

and remains at this time, in a state of uncertainty. In an effort to determine our position, I have renewed correspondence with the national forester and hope to have more up-to-date information soon. I believe that under any circumstances we will have a chapter of Xi Sigma Pi at Auburn before the year is out. I am sure I don't have to tell you what this will mean to the forestry school and to the members of Silvanus. Perhaps this action will also serve as an incentive to those of you who have not yet been to summer camp. Membership, whether national or local, is well worth any effort required to attain it.

As a second item of progress, Silvanus announces the near completion of a project begun last year by Ken Luke. It has been in the process but the end is in sight. The project to which I refer is the construction and display of the Silvanus Society Honor Plaque which will soon appear in the reading room. Upon this plaque will be the names of the students attaining the highest scholastic averages at the end of their sophomore year. Four names appear on the plaque now and a new one will be added each year. Membership in the Silvanus Society does not enter into the selection of the honor student. It is a wide open field and the best man will win.

While reviewing the progress of the Silvanus Society, I believe it appropriate to look into the development of a movement sponsored by both Silvanus and the Forestry Club that has thus far received the full cooperation of every forestry student. Let me ask you this question: "What building is the cleanest on the campus?" Another question: "Why?" The answers are a matter of record. We have the cleanest building on the campus because we've kept it that way. What has been done in the past will not, however, suffice for the future. We have done a good job but, unless we continue to do one, all past accomplishments become meaningless. We have established a campus-wide precedent; we cannot have it known that we are guilty of negligence now. I wish to bring these points out as a reminder for it has come to my attention that we are becoming guilty of just such negligence. I am sure we are not aware of the fact and would certainly do nothing to deface the building intentionally, but it is very easy to become careless and slip up now and then. As the reading room serves as a point of concentration, I think it deserves special attention. I have noticed lately that it is in pretty bad shape. The tables are covered with magazines and papers not returned to their proper place on the shelves. I know it's not as easy to put a magazine back as it is to get one down, but I think we should all try anyway. If we work real hard at it I'll bet we can do it. When Wednesday rolls around the room is always full of discarded *Playboys*. I would like to suggest that, if you don't wish to keep them, just place them in the waste can instead of leaving them scattered hither and yon. It will improve the looks of the room 100%.

Let's try to revive our interest in the cleanliness of our building. It's for our use and benefit; it's up to us to care for it. When spring rolls around Silvanus will organize a spring cleaning group and give the classroom walls a good scrub down, but meanwhile save yourself a little work and KEEP IT CLEAN.

WOOD CHOPPER'S BALL MARCH 22

Forestry students beards shoping up for the big night. The boys are (left to right) Dick Holt, Ned Gant, Charles Rollins, Lewis Walker and Bob Smith.

By D. J. Smith

Son, if you ain't got a tux, don't hang your head in shame. If you can't look like a Spanish Pirate, don't stay home! Just put on those old dungrees and bring little Mattie Lou over to the BIG DANCE of the year. An' son, if you don't know what dance that is, you jes' ask any of them little gals running 'round the campus with their little old cheeks all scratched up. They'll tell you it's that gatherin' of the clan, that stompin' hoedown, that shore 'nough Party, the WOOD CHOPPER'S BALL.

An' jes' in case you don't know what the Wood Chopper's Ball is, Ah'll tell you all 'bout it. It's that dance the Forestry Club throws every spring for everybody who cares to attend, and if you don't believe it's a good un, you jes' come and see. It's the BIG DANCE of the year! It's homecoming for the Forestry Alumni, a treat for the campus, and the only night in the year a forestry prof can turn his back on a student with an axe in his hand. Why last year a bunch of foresters from up Chitlock way pitched a tent in Ross Square and camped two days, just to be here on time!

But back to that little gal with the scratched cheeks. You can bet she'll be glad to see the ball come, cause after that her own private forester can shave that nasty old beard. You know we had a beard-growing contest along with it, didn't you? Sure, and we give prizes too, for both the best and the worst beards. Already a pretty good crop of beards is showing up. They're everywhere; on Ag Hill, Vet Hill, Society Hill, and even way over in the Forestry Building. First prize is a genuine electric razor, and all previous winners have been disqualified, so if

you can grow any sort of a beard at all, better get started. You don't have to be in Forestry to win, just a student with the best set of chin shrubbery.

But that beard growing isn't all there is to the Ball. Why, on this night, we bring the Forestry Plot to you! Trees all over, with vine covered nooks for sitting, a real rail fence, and nice, soft pine needles on the floor. The old Student Act. Building will be filled to overflowing as always with folks, trees, hound dogs, chop axes, shootin' irons, and general paraphernalia. Music will be furnished by the Auburn Knights and a good time is sure to be had by all.

It's not just a dance. The beard judging and the floor show are worth the price of admission. Why, that floor show doesn't go on just during (or-mission, no st!) We are hoping to have a return engagement from that noted dancer, Bill (Red Beard) Black, who has performed so well at dances in the past. Both "Red Beard" and the Forestry Department combine to throw a really swell party. When the Forestry professors and students get together, it's got to be good.

This is the first year that the Ball has been official Homecoming for the Forestry Alumni. Several of the more recently graduated have written us that they will be here, and we are hoping for as many old grads as possible. We in Forestry are a close knit group, and we don't want to split after graduation. The Ball is the event of the forester's year, so come on in Alumni, we'll be ready.

Remember, March 22, 1952, is the day. Tickets will be on sale soon, so get yours and plan on having a grand time. You won't be disappointed.

FORESTRY PHOTOGRAMMETRY SHORT COURSE

By D. W. Woods

A condensed course in forestry photogrammetry is being offered by the Department of Forestry, Alabama Polytechnic Institute, Auburn, Alabama. Three five-day short courses are being conducted by Mr. Evert W. Johnson, of the department staff.

The first of these courses began February 11th and ended the 15th. The second will begin February 18th and will run until the 22nd, and the third will begin the 25th and will run until the 29th. Classes are scheduled each day (Monday through Friday) from 8:00 a.m. to Noon, 1:00 p.m. to 5:00 p.m., and 7:00 p.m. to 9:00 p.m. Acceptance of applications was on a first-come, first-served basis. At time of press 25 applications had been received.

The subjects covered are: the aerial photograph, using the stereoscope, mapping, forest photo-interpretation, tree height measurements, area determinations, volume determinations, specifications for aerial photos, procuring aerial photos and other uses of aerial photos.

A certificate of attendance will be given each student completing the course.

ALUMNI ELECT OFFICERS

By James Rice

During the Homecoming festivities last quarter the returning forestry graduates met to elect officers to serve for the coming year in the Auburn Forestry Alumni Association. The results of the meeting should place this growing organization ever more in the realm of professional forestry.

Two officers, a president and a combination secretary-treasurer, were elected along with three men to serve as job contacts in various sections of the State. Mr. Walter J. Culberson, a Management graduate in the class of '49, was headed the presidents gavel. Mr. Culberson is located at Centerville, Alabama, with the Coosa River Newsprint Company. Mr. William A. Ray was elected secretary-treasurer. Mr. Ray, a 1950 graduate of Business Forestry is located at Magazine, Alabama, with the Coggins Lumber Company.

For the sake of simplicity in the field of job contacts, the State was divided into three areas: North, North Central and South, with a well known Auburn alumnus representing each section. Mr. A. J. Hyatt located in the Elks Building at Huntsville, Alabama, has been designated to cover the North section of the State. Mr. James F. Stockman located at Littleton, Alabama with the Alabama By-Products Company will cover the North Central section and Mr. R. H. Riggs located at Brewton, Alabama with the T. R. Miller Lumber Company will handle the South section. These men will welcome any information on job possibilities and will assist those interested in jobs in their particular area. These representatives and the secretary-treasurer will also gladly receive any news items for the Auburn Forester, preferably during the first month of each quarter.

ALUMNI NEWS

By Bob Smith

As the number of alumni increases, the job of gathering information on each of them becomes more and more difficult. The staff of the Auburn Forester is doing its best to keep you informed on changes of address and other bits of news about former students that we think would be of interest. We have managed by one means or another to get the word on almost all of the graduates; but as of late, with the help of Uncle Sam, what we think is news may have become ancient history. If you can bring us up to date on yourself or any of your classmates, we would appreciate a card or letter.

Looking down our list of news items, we see that quite a few of the old grads were seen at the Society of American Forester's meeting in Biloxi, Mississippi, in December. Among those seen were "Ace" Levi, who is still with International Paper Company; and Johnny Cook, who remains loyal to Hollingsworth-Whitney. Walt Bullock came down the river from Murphy Corporation at Tuscaloosa to see all the boys at Biloxi. He also came to the alumni breakfast at Barjeev's. Claude Swift attended the meeting and the breakfast also. He is with W. E. Belcher Lumber Company in Centreville, Alabama, and his wife is teaching school there. Daniel Baggett, being right next door, drove over from Bay St. Louis to talk with alumni and foresters. He is still producing for International Paper Company. Erdman Barhardt breezed into the meeting from Vicksburg, Mississippi, and we understand that he is still plugging for hardwoods with Anderson-Dally.

Paul Allen was there, but he couldn't find the main room at Biloxi, because he wasn't close enough to home (Bay Minette). He still favors International Paper Company. Jim Burnham and Jimmie "Baseball" Smith both found time to take in the meeting. Jimmie still claims the Hollingsworth-Whitney address for payroll purposes. Jim Burnham works with the Masonite Corporation in Laurel, Mississippi.

The utility company boys took time off to drive over to Biloxi. You guessed it, Ernie Moore and Frank Stewart, who are with the Alabama Power Company. Ernie had a part in a fire symposium in Dadeville last fall, and according to the mails he has applied for a license as a land surveyor. Frank Stewart's picture was in a recent issue of "Powergram," which is published by the Alabama Power Company.

Vernon Yow, "Uncle Fud" Fress, and Woodrow Deason were also seen at the meeting. Vernon traveled all the way from Tifton, Georgia, to attend. Prosperous work, this teaching game, with cigars et al. He is an instructor in forestry at Auburn Baldwin Agriculture College at Abbe, Georgia. Woodrow is working with Sizemore and Company of Tallahassee and came down to the meeting with Bill Sizemore. He hasn't lost any in height, not gained in weight; even after the A.P.I. breakfast at Barjeev's. Uncle Fud wangled a trip to Biloxi after his recent promotion. We understand that he will be out of the woods for awhile trying his hand at quality control at Gulf States Paper Corporation in Tuscaloosa. He's not married.....yet!

Conro Olive, Walt Cutberson, A. J. Hyatt, and R. C. Wakefield attended the annual meeting of the Southeastern Sec-

tion of the Society of American Foresters, which was held in Tallahassee, Florida, on January 25 and 26.

R. E. Williams was the only alumnus seen at the January meeting of the Southern Pulpwood Conservation Association held in Atlanta.

All of the men that graduated at the end of the fall quarter have jobs. Willie Fadgett accepted Uncle Sam's invitation about a week before graduation, and we have received word that "Moose" Johnson is in the Marines now. Bill Black, Norman Kent, and Jim Haynes are all with Gulf States Paper Corporation at Tuscaloosa, and "Doc" Pipkin called from Birmingham recently and informed us that he is employed by T. C. I. Jim Stockman informs us that he saw "Doc", Bill Koier, and Jimmie Smith at the Keep Alabama Green meeting on January 28.

John Kite was recently employed by the International Paper Company as a conservation timber marker. John will be stationed at Brookhaven, Mississippi. In his new job he will advise and assist private landowners in their forestry problems, as well as other phases of International's conservation and education programs.

Leon Estes is still making the public Forestry conscious in the vicinity of Grenada, Mississippi. The Estes recently announced the arrival of a son. Not to be out done the Ogletrees made a similar announcement in November (we believe it is Bill, Jr.) Bill Sr. is in the service. Don and Alva Mae Parker now have a son, Roger. They have moved from Centreville and W. E. Belcher Lumber Company to Union Springs, Alabama, where Don is jointly in the lumber business.

Wallace Wells is working on the A.P.I. forest at Payette. His work is under Frank Smith, associate forester. He is using fire in loblolly pine and working on management research. You even find a bow tie on woods foresters.

Bob Throver visited the Department in January and reported that he is now employed by John Corbin, pulpwood dealer, and he will be busy in pulpwood procurement.

Joe Christopher is now up with the wheels. Recently he had an occasional paper released on *Timber Drain* by the Southern Forest Experiment Station. Keep up the good work, Joe, even though foresters never have to write. He has had an addition to his family also (Claude B. on September 10).

Lua Blankenship is still making progress. He received his Masters degree at A.P.I. in December in Wildlife Management, and he is working on the Pittman-Robertson project in Alabama. The Blankenships announce the arrival of a daughter, Rene, born last November.

We understand that Conro Olive has recently been put in charge of the T. V. A. nursery at Muscle Shoals, Alabama. Conro is co-author with Mr. Charles Umland of a booklet titled "Job Calendar for T. V. A. Forest Nurseries".

Archie Ray's picture appeared in the January issue of *Alabama Lumberman*. He is shown displaying swen-ply rotary-cut white oak plywood. We hear that Archie has left Belcher Lumber Company and has gone to work with Coggins Lumber Company of Magazine. Archie is secretary of your Alumni Association so send him your dues, (two dollars).

W. B. Dabberly stopped in at the

Department on November 19. Dub is interested in getting into a forestry job because he expects to wind up his veterans training program in Greenville soon.

R. C. Wakefield has left the Alabama Division of Forestry and taken a job as Conservation Forester for Coosa River Newsprint Company.

Nall Van Cleare sends us word that he has all kinds of game at his place on River Styx near Cantonment, Florida. He is with the St. Regis Paper Company there.

Charlie Brown has left Kaul Lumber Company at Elyacuga and has gone to work with Fashae Lumber Company of Montgomery.

THREE STAFF MEMBERS ATTEND MEETING OF THE ASSOCIATION OF SOUTHERN AGRICULTURAL WORKERS

The 4th meeting of the Association of Southern Agricultural Workers was held in Atlanta, Georgia, February 4th, 6th and 8th, 1952. Three members of the Forestry Department staff, W. B. DeVal, H. E. Christen and Floyd Goggens attended the Forestry Section of the meeting. Officers elected for the coming year included W. B. DeVal, Head of Forestry Department, Alabama Polytechnic Institute, Chairman; J. S. Therrill, Mississippi State College, Vice-Chairman; and G. N. Bishop, University of Georgia, School of Forestry, Secretary-Treasurer. Professor H. E. Christen, A.P.I., presented a paper on Simplified Method of Pulpwood Estimating. The annual meeting for 1953 will be held in New Orleans, Louisiana.

STAFF MEMBERS ATTEND S.A.F. MEETING

Six members of the A.P.I. Forestry Department staff, W. B. DeVal, Boyd Richards, Evert Johnson, Harold Christen, Jack May and Knox Livingston, attended the annual national meeting of the Society of American Foresters last December 12 to 15 at Biloxi, Mississippi.

GRADUATE PROGRAM IN FORESTRY TO BE OFFERED

A graduate program in forestry leading to the M.S. Degree was approved by the Council of Deans at their meeting on February 5, 1952. It is anticipated that graduate work will begin with the Fall quarter this year. Thus another big step forward!

The A.P.I. Department of Forestry first offered forestry curricula leading to a B.S. Degree the Fall quarter, 1946, and was accredited by the Society of American Foresters last year. Such outstanding progress has made Alabamians justly proud.

Plans are being made to have printed announcements sent to all alumni, forestry schools and interested persons. A supplement to the catalog of the graduate school will be printed in which the forestry courses offered for graduate credit will be listed.

ALUMNI AT WORK

By James Stockman

James F. Stockman, '51 says . . . I am working for the Alabama By-Products Corporation, Birmingham, Alabama. The company is primarily engaged in mining coal and producing foundry and domestic coke, offs, tars, and other by-products. The company in the past 50 or 60 years has acquired a sizeable acreage of mineral and surface lands in Jefferson and Walker Counties and a few scattered 40's in Cullman, Blount, and Marion Counties.

Stockman and family at their home in Littleton, Alabama.

At the present time five coal mines are being operated and all the required timbers, boards, props, "T" or donnet boards, cross collars, roller blocks, and cap boards are being cut from company lands. This material is cut and delivered to the mines by contractors—two small sawmill operators and three mine prop contractors.

Prior to 1933 there was no regulated form of cutting. Contractors cut indiscriminately which resulted in large areas being clear cut. This clear cutting was confined for the most part to the level and easily accessible areas with very little cutting in the ravines and on the steep hillsides. Also there was very little of the low grade hardwood cut and used for lumber or mine props. As a result of such cutting practices and wild fires, there are areas that have little or no pine reproduction today.

In 1933 the company made the first attempt to put their forest lands under management by hiring Mr. J. W. Lindsey to cruise the timber and to protect the lands from forest fires.

Mr. Lindsey who is now Superintendent of Forestry, has improved the cutting practices since 1933 and has protected the major portion of the company's land from wild fire. Many of the bare areas are beginning to come back with a fair stand of pine reproduction.

From 1943 to 1948 the company operated a sawmill, under the supervision of Mr. Lindsey, to supply the material necessary to rebuild a coal preparation plant that was destroyed by fire. Lumber and other materials needed by the coal mines in their operations was also produced. During the time the mill was in operation a large amount of low grade hardwood was cut and used in place of pine. A modified form of clear cutting in groups has replaced the clear

Bay St. Louis, Miss.

cutting of pines and has resulted in more than an adequate seed tree stand.

During the past year the company has initiated a program to mark all the timber that is being cut by the contractors with emphasis being placed on the utilization of low grade hardwood whenever possible. Pine is being cut under the following circumstances: thinning when needed in stands that are too thick, all virginia pine that is merchantable, shortleaf pine that is infected with Little Leaf Disease, longleaf and loblolly pine that is overage and considered a poor risk, and loblolly and shortleaf pine that is large enough to cut into timbers for special orders when needed. In the hardwood stands southern red oak, white oak, american sweetgum, and yellow poplar are being favored whenever possible. Most of the marking to date has been chiefly timber stand improvement and will continue to be for some time.

There are other things that go along with the management of forest lands, many of which you have heard from the day you walked into A.P.I. A few of them get to be troublesome at times. For instance, protection of land from fires that always seem to start from trash burning on warm, windy days. Then there are those who never look or care when they cross a boundary line while looking for two or three choice trees to cut and haul away for a little spending money. Among other things the question of the lost land corner which may have been a rock, a "light-ered" stake, a piece of pipe, an automobile axle or a fence corner which has not been seen in 10 years even though it was placed on a preliminary survey that was made 20 years ago. The exception is the fellow who builds a house over a section corner—just try running a section line from it. It can be done but it gets complicated. Take the case of the poor fellow who just doesn't have enough space to build a house on his own land and builds it so the line splits it in half and later decides that he needs a garage for his Buick and builds it 30 feet over on your side of the line. Oh well, such is the life of a forester.

SYRACUSE FORESTRY STUDENTS SHARE HOSPITALITY OF FORESTRY DEPARTMENT

Two car loads of forestry students from Syracuse stopped over here for a short visit while enroute to the Society of American Foresters meeting in Biloxi, Mississippi. "Head" Gaskins (Wayne W. Gaskins), formerly a faculty member at A.P.I. and who is now working on his doctorate at Syracuse, was along as chaperone. They camped out during the trip and stayed in Auburn just long enough to get a warm shower, shave and a look around the campus. All expressed amazement as they viewed the forestry building and the plantations.

*MAILING ADDRESS

JOKES

Maybe they're called virgin pines because they've never been axed.

There aren't nearly enough crutches in the world for all the lame excuses.

In discussing the advantages of membership in a certain order, a friend of ours stressed to his wife the point that the group met in a spirit of friendly informality. At this point the colored maid entered and hearing the remark she commented: "Dat's what I likes about our lodge meetings too. Mistah Mac---we meets in friendly immorality."

It takes a lot of nerve to wear one of those strapless evening gowns. Yes it does, but that's not all. It takes a couple of other things, too.

The floorwalker stiffly replied, "Escalator, Sir." "Ask you inter?" shouted the little boy impatiently, "I gotta go now!"

Passenger to Pilot: How are we doing?
Pilot to Passenger: We're lost but we're makin' good time.

A hypocrite is an undertaker at a \$1000 funeral trying to look sad.

A rabbit is a little animal that grows the fur the other animals get credit for when it is made into a woman's coat.

She: "I'm the Miss in Mississippi."
Her: "I'm the Sis in Cincinnati."
Lulu: "I'm from Astoria."

Why, I never was so insulted in all my life! Isn't he perfectly thrilling?

Anatomy is something everyone has, but it looks better on a girl.

"Adultery is as bad as murder. Isn't that so, Sister Brown?" shouted the evangelist. "I don't rightly know," replied Sister Brown. "I never killed anybody."

Reet Tanner thinks a prime minister is a preacher at his best.

The trouble with most household budgets is that there's usually too much month left over at the end of the money.

When two dull people get together it's a bore. When fifty dull people get together it's a cocktail party.

You have to feel low down to milk a cow.

Some people sing in the bathtub because the door won't stay locked.

Famous Last Words: Guess what, dear, I sold the baby buggy.

The only time you realize you have a reputation is when you are not living up to it.

If a man is too lazy to think for himself, he should get married.
